Portfolio: w1nestra.github.io/portfolio

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience designing production-ready marketing websites in Figma and conducting manual QA testing on business software. Skilled in visual design and QA testing, with a background spanning both building interfaces and testing them for real-world use.

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

Far Eastern University – Cavite | Silang, Cavite

- *Magna Cum Laude*
- *Best Capstone Project Award 2025 – “Library 360: A Web-based Library Management System with Analytics and Recommendation for FEU Cavite Libraries”*

WORK EXPERIENCE

UI/UX Designer & Software QA Tester Intern

February – May 2026

Integr8 Software Solutions, Inc. | General Trias City, Cavite

- Designed and led the UI/UX development of the company's digital marketing website in Figma, communicating design decisions closely with developers throughout implementation
- Redesigning 7 webpages for a sister company's marketing website using WordPress Elementor, modernizing the sister company's online presence
- Designed 10+ branded visual assets in Canva to support the company's marketing campaigns, events, and internal initiatives.
- Conducted manual functional and usability testing for accounting and payroll software, documenting 40+ issues and improvement recommendations in Microsoft Excel prior to deployment.

PROJECTS

Library 360 (Capstone Research Project – Library Management System)

- Conducted the review of related literature to establish the project's research foundation and design/technical direction
- Designed user interface for a library management system using Adobe Photoshop, applying user-centered design principles
- Managed and organized technical documentation using Jira for a capstone research project under Agile methodology
- Conducted functionality and usability testing for the software to identify and resolve issues prior to deployment

Brave Refuge (Game Development Project)

- Created hand-drawn 2D animation and visual assets for an academic game development project using Adobe Photoshop
